

# Sleepshop

Your Sleep Care Specialist

## MATTRESS INNOVATION

### POSTURE CYLINDER

Provides extra support for better spinal alignment and proper sleep posture.

### EDGE SUPPORT

Edge Support strengthens mattress edges which reduces the "edge roll-off", giving you more room to stretch.

### BONNELL COIL

Hourglass-shaped springs that provide support in innerspring mattresses. The wide portion of the hourglass flexes easily and allows the body to sink in when weight is applied, providing responsive initial comfort.

### HIGH RESILIENT FOAM

These foams contour to the body exceptionally well, enables extreme elasticity and optimal supporting force.

### POCKETED COIL

Individually wrapped pocket springs that offers supreme motion isolation, support and longevity.

### HIGH DENSITY FOAM

A type of foam that is packed tightly together to create a cosy feeling that you can't get with most innerspring mattresses.

### OPTIMUM COIL

Conforms to your body's unique shape and offers more contoured support and better movement isolation.

### HYPO ALLERGENIC

Protection against bacteria, dust-mites and allergies.
